EXPERIENCE

The Card Company | Gurugram | Software Development Engineer (Full-Time) Jan 2026 - Present

Java, Springboot, Microservices, REST APIs, Feign Client, Redis, JUnit

- Implemented integration of MMTC APIs to enable **digital silver trading (buy/sell)** and conversion of holdings into **real silver-backed investment**, ensuring secure request flows and validations.
- Designed and implemented the **Initiate Refund Transaction API**, enabling secure and seamless refund processing across services using **Feign Client** for inter-service communication.
- Integrated **Card91 APIs** for card-related services, managing **end-to-end request/response flows**, validations, and comprehensive **error handling**.
- Ensured **secure and reliable third-party API integrations** through proper validation, exception handling, and extensive unit testing using JUnit.

Morgan Stanley | Mumbai | Software Developer Intern Jan 2025 - Aug 2025

Data Synchronization Utility | Java, Springboot, JUnit, MongoDB, Apache Zookeeper

- Engineered **cross-DC leader alignment automation** using Zookeeper-based leader election integrated with MongoDB replica set detection, improving **data locality** and reducing **inter-DC latency**.
- Developed a **resilient Optimus application** using a modular **Data Access Layer (DAL)** enabling dynamic orchestration and **scalable system behavior**.
- Implemented **real-time service discovery** via **Zookeeper APIs**, ensuring **high availability (HA)** and **business continuity (BCP)**.

Morgan Stanley | Mumbai | Software Developer Summer Intern May 2024 - Aug 2024

Ticketing system Admin Dashboard | HTML, CSS, JavaScript, Optimus UI

- Built the **complete end-to-end backend** for an admin dashboard, automating ticket request processes (e.g., revert, cherry-pick).
- Enhanced operational efficiency via a **user-centric Optimus UI**, reducing manual intervention and improving processing speed by **30%**.

PROJECTS

Steel Surface Defect Detection(B.Tech Project) | Deep Learning (YOLOv5), Gen AI (GANs) June 2025

- Overcame limited dataset diversity and class imbalance in steel defect detection, which reduced model accuracy across **six** defect types.
- Built a real-time YOLOv5 detection system with **GAN-augmented data**, achieving **74% mAP@0.5** and up to **93% precision**.

SKILLS

Programming Languages: Java, C++, JavaScript

Backend Development: Spring Boot, Microservices Architecture, RESTful APIs, Feign Client

DevOps & Cloud: CI/CD (GitHub Actions, Jenkins), Docker (Basics), AWS (Academic Exposure)

Tools & Testing: Git, Bitbucket, Postman, JUnit

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Agile Methodology

Soft Skills: Fast Learner, Collaborative Team Player, Proactive, Continuous Improvement

ACHIEVEMENTS

- Morgan Stanley Coding Challenge Women** — One of the **26 winners** out of **800+** participants.
- LinkedIn CoachIn Program 2023** — Selected among **60 out of 7,500+** applicants.
- United Airlines Girls in Aviation Program** — Selected among the **top 30** for the prestigious in-person event.
- Flipkart GWC 5.0 Mentorship Program** — Selected among **200 out of 13,000+** participants.
- Solved **500+ Data Structures and Algorithms** problems across online coding platforms.

EDUCATION

Indira Gandhi Delhi Technical University for Women

December 2021 – May 2025

Bachelor of Technology

New Delhi, Delhi

CGPA: 8.34/10
